**To be held**

**9:00 AM, Monday, July 21, 2025**

**NOTICE IS HEREBY GIVEN** to all interested persons within the Prairielands Groundwater Conservation District, consisting of Ellis, Hill, Johnson, and Somervell counties: That the Board of Directors of the Prairielands Groundwater Conservation District (PGCD) will hold hearing(s) on applications for Exceptions to Minimum Spacing Requirements by the below listed parties on Monday, July 21, 2025, beginning at 9:00 AM at the District board room located at 208 Kimberly Drive, Cleburne, Texas 76031.

---

**Applicant/Owner:** Undine Texas, LLC (Crowley II Acre Subdivision), 17681 Telge Road, Cypress, TX 77429

**Type of Application:** Exception to Well Spacing Requirements

**Location of well:** 32.537158, -97.448991; LOT 4 BLK A (CENTRAL PT) CROWLEY II ACRES Acres:1.0100; Johnson County

**Description of Request:** Undine Texas, LLC (Crowley II Acre Subdivision) is seeking an exception to the District's Well Spacing requirements under District Rule 4.7 in order to operate a new water well to provide potable water to residents of the Crowley II Acre Subdivision located in Johnson County at 11155 CR 1015, Crowley, TX 76036. Applicant received approval for OP-21-015 in October 2021 for the registration, drilling, and construction of a "New Well" (ID No. PGCD-002620) to be screened in the Paluxy formation of the aquifer. This approval was granted with the condition that the "Existing Well" (ID No. PGCD-001080) would be plugged within 30 days of completing the new well, as the two wells were only 24 feet apart and did not meet spacing requirements. Applicant is requesting an exception from the well-spacing requirements between PGCD-002620, PGCD-001080, PGCD-001078 (the "Rock Creek Well"), located at 3707 Rock Creek Dr, Crowley TX, and PGCD-003675 located at 3911 Chisholm Trail Rd, Crowley, TX. Following completion of the New Well, the intended maximum capacity was not achieved. Therefore, the applicant is requesting an exception to spacing in order to continue operating the Existing Well to meet the water system's capacity needs.
